Career Objective

Dedicated and hardworking vocational student with hands-on training in Artificial Intelligence Programming Assistant & Data Analytics. Seeking an entry-level role in a reputed organization to apply technical knowledge, enhance practical skills, and contribute to team success.

Education

Class 10, S.R. Inter College High School, Orai

2020 - 2021

70.67% Orai

Internship / Training

Artificial Intelligence Programming Assistant – DGT, Microsoft & Edunet Foundation (NSTI)

2025-2026

- Responsibilities / Learning:
- Python, MySQL, PowerBI
 - The Artificial Intelligence Programming Assistant course by Directorate General of Training (DGT) provides foundational knowledge in AI and programming for ITI students.
 - Supported by Microsoft, the course integrates industry-relevant tools and technologies.
 - Implemented in collaboration with Edunet Foundation, it emphasizes hands-on projects and real-world applications.
 - Covers core concepts such as Python programming, data handling, and basic artificial intelligence techniques.

Skills

- Basic Computer Applications (MS Word, Excel, PowerPoint)
 - Data Structures & OOP (Python)
 - SQL (MySQL)
 - Computer Vision (OpenCV)
 - Generative AI (Transformers)
 - Deployment using Streamlit/Flask
 - Copilot Studio Chatbot
 - Deep Learning (TensorFlow / Keras)
- Natural Language Processing (NLP)
 - Artificial Intelligence and Machine Learning
 - Machine Learning (Basics)
 - Data Analysis & Visualization (Pandas, Matplotlib, Power BI)
 - Communication
 - Teamwork
 - Problem-solving

Projects / Practical Work

User Registration System & Login System (<https://github.com/Jeevan92-coder/User-Registration-System-Login-System>)

- Developed a secure authentication system enabling users to register and log in using validated credentials. Implemented data storage, password protection, and session management to ensure secure access and user data integrity.

Customer Segmentation using Clustering (Python) (<https://github.com/Jeevan92-coder/Customer-Segmentation-using-Clustering-Python->)

- Developed a data analysis project to segment customers into distinct groups using clustering algorithms such as K-Means. Processed and visualized customer data to identify patterns in behavior and

purchasing habits. This model helps businesses improve targeted marketing strategies and decision-making.

Customer Segmentation Analysis (Power BI) (<https://github.com/Jeevan92-coder/Business-Data-Analysis-Dashboard>)

- Designed an interactive Power BI dashboard to analyze and segment customers based on key metrics such as demographics, purchasing behavior, and sales trends. Utilized data visualization techniques to identify high-value customer groups and support data-driven business decisions and targeted marketing strategies.

Bank Customer Churn Prediction (<https://github.com/Jeevan92-coder/BankChurnProject>)

- Developed a machine learning model to predict customer churn in the banking sector using historical customer data. Performed data preprocessing, feature selection, and model training to identify customers at risk of leaving. The solution helps businesses improve retention strategies and reduce customer attrition.

Object Detection System (<https://github.com/Jeevan92-coder/Object-Detection-System-Detect-multiple-objects-in-an-image>)

- Developed a computer vision system to detect and classify objects in images or video streams using deep learning models. Implemented data preprocessing, model training, and real-time detection to accurately identify multiple objects. The system can be applied in areas such as surveillance, automation, and smart applications.

Certifications

Artificial Intelligence Programming Assistant Edunet Foundation, 2025-2026	Prepare Data for Analysis with Power BI Microsoft Learn, 2025	Create machine learning models Microsoft Learn, 2025
Career Essentials in Generative AI Microsoft and LinkedIn, 2025	Career Essentials in Data Analysis Microsoft and LinkedIn, 2025	Query and modify data with Transact-SQL Microsoft Learn, 2025
Career Essentials in Software Development Microsoft and LinkedIn, 2026	Introduction to Cloud Infrastructure: Describe cloud concepts Microsoft Learn, 2026	Career Essentials in Cybersecurity Microsoft and LinkedIn, 2026

Achievements

Customer Segmentation Analysis (Power BI) <i>Microsoft</i>	2026
